

Academia Allegiances and Toxic Narratives

There is a gay little club that has destroyed academia. The Athenian system is alive and well within American academia. Jews are aligned within the Athenian system of democratic republicanism. There are direct rivalries between Spartan/Pythagorean thinkers and Athenian linguists. I will explore Project Paperclip narrative claims to show this distinction and create a timeline of associations starting with Sigmund Freud.

Sigmund Freud was born to a line of Ashkenazis Jews in the Austrian Empire in the Moravian town of Freiberg. He lived from 1856-1939 and was an operative from the University of Vienna. The school that Hitler was denied entry from. University of Vienna is associated with Austrian School of Economics which includes the Mises Ancap umbrella of thinkers and thought experiments. The end result of Ancap ideology was happening in Weimar Germany during the 1920s. Hedonistic hell of child abuse and slavery. We should also note that the University of Edinburgh line also known as the Chicago School of economics is a watered down version of this both Athenian systems with overlapping participants. This loosely associates Freud with Mises which will be important later. Freud was a trained linguist in the grade/high school years at a prestigious private school called "*Leopoldstädter Kommunal-Realgymnasium*". He learned German, French, Italian, Spanish, English, Hebrew, Latin, and Greek at this school. When he turns 17 Freud enrolls in the University of Vienna. While attending there he translates 4 essays by economist John Stuart Mill and Freud builds a direct relationship with philosophy professor Bertrano. Freud is also known for his studies on cocaine and addictions being replacements for masturbation ideas. Freud did studies on addiction based enslavement. Also note that he failed to mount a rebuttal to Nietzsche, whom he hated. Psychoanalysis and Dream Analysis are two concepts from Athenian Socratic lineage that Freud created and developed. Carl Jung was a rival to Freud as well, this is worth noting as far as supporting evidence of allegiance chain.

The Astro-Hungarian Empire lost World War 1 because of the leadership selection system that led to putting people like William Reich in charge of 40 men. Reich joined Freud's psychoanalysis company in 1919. During this period of time Reich had a series of relationships that all included abortions as well as one dead girlfriend whose family thinks its related to abortion. Being associated with the sexual studies in Germany Denmark and Norway as well as abortion would have Reich at odds with the National Socialist regime and be a high priority issue for the National Socialists. Reich had an invention that utilized a made up particle called bions. Because Bions were observed to be falsified by the University of Oslo, Reich had Einstein write a review of his Bion invention. Einstein agreed with him before making a criticism. Reich used this to build credibility in American academia and Einstein kept his. Reich more than likely employed his knowledge of sexual incentives in these exchanges. Reich's expertise was in information extraction, not physics.

Through the Nuremberg trials the Allied powers, acting in behalf of Jewish interest, prevented the research for a cure for cancer from taking place. This means they are actively preventing the cure of cancer because it would have to source National Socialist research. So they associate it with Mk Ultra instead of curing cancer. Wikipedia tries to say that since top NS

generals used Kurt Blome's research it must have been for offensive purposes. Hoping that we would miss the value in preventing the exposure to NS soldiers to chemical hazards discovered by his research. The Project Paperclip narrative directly interferes with modern day cancer research. Kurt Blome is the main scientist they cite as being involved in the Operation Paperclip as being evil, but there is no evidence of him breaking the Hippocratic oath. Wikipedia claims there were roughly 1600 scientists assimilated from this operation.

Wikipedia sources a Princeton article making claims about the intent of "Lightning Rod" operation by the axis. Princeton is a known Athens based traditionalist college and would have great incentive to discredit a Spartan aligned thinker. The revelations of Colonel Griggs life reveal some very nasty things about tradition in Princeton. Princeton has produced many Naval Intelligence Officers. This sets a pattern of dishonesty within the Princeton Academic system since in the Kay Griggs interview they explore disinformation concepts from Princeton. Wikipedia asserts that a closely related biological warfare program was used in the concentration camps starting in 1943. It is again from an Oxford source, a British Naval Intelligence college. They assert this to get out of taking responsibility for the mass starvation the allied powers caused during the blockade years from 1943 to 1945. There are other claims by compromised sources as well. The sources from the wiki article include Oxford Princeton Harvard and Praeger presses. The Allied powered Universities came up with an excuse or myth to explain away the bad effects of WW2. There were no Universities used from neutral countries, just ones with direct government ties.

My view on the Nuremberg trials is relevant to the conclusions of this project so it is my belief that it was a complete show trial. Most of the sources used in the ivy league schools comes from the Nuremberg trials. These testimonies are compromised by torture and fake defendants, spies posing as defendants and snitches motivated by fear. So the mass mosquito releases are more than likely fake as well. Carolyn Yaeger goes through the economic system behind the NS system. She shows the high priority to keep his people fed. Something that transcended religion and would show the priority of pesticide and insect control for food production. Also since there was not any mass natural damage due to the concentration camp we can rule out a lot of the mass testing theories there would have been periphery damage surrounding the camps. Damaging their own food supply.

MK Ultra i believe is an inversion of intent of the research done by Blome. The intent of the project was to develop mind control techniques, including truth serums. MK Ultra used unsuspecting victims to test LSD. Sidney Gottlieb was a poison expert, who was born in 1918 roughly 20 years or so younger than William Reich, both are Jewish descent. Most of the wikipedia associations are citation needed claims. Unverified claims include a connection to Lockheed Martin for the U2 spy plane. The claims with sources include the LSD experiments like the ones done in the Australian I AM society or the White Brotherhood affiliate.

LofiLovefield source claims Julian Assange was part of the child LSD experiments in Australia. That the cult was used as a cult for.

The modern day claims of Project Paperclip were crafted in the 1990s largely by a few authors all tied to Ivy league east coast schools, oxford, and the university of Cologne. All of the authors are of Jewish descent and one in particular works for the Uni of Tel Aviv but she graduated from Uni of Cologne. This is also how each school associates members on overlapping projects. Their claims include non consensual human testing with pesticides and

dropping mass mosquitos on the concentration camps. After studying this over the timeline the big academic beefs have lineage to the pythagorean/spartan school vs the Athenian socratic school. Many ethnic jews champion the Athens line. The linguistics line.
